## ROAD CONSTRUCTION SITES: COUNT TO 10!

### FENCING AROUND CONSTRUCTION SITES

SAFETY STARTS WITH THE BOUNDARIES THAT DELIMIT AND MARK EVERY WORK AREA.

### SIGNS A THE CONSTRUCTION SITE AND MANAGEMENT OF VEHICULAR TRAFFIC

THE ROAD CONSTRUCTION SITE IS ALSO INFLUENCED BY EXTERNAL VEHICULAR TRAFFIC. SIGNS ARE THE FIRST THING TO USE TO PROTECT THOSE WHO WORK AT THE SITE AND THOSE WHO PASS BY.

### PERSONAL PROTECTIVE EQUIPMENT (DPI)

REMEMBER THAT SAFETY STARTS FROM A DISTANCE: MAKE SURE YOU CAN BE SEEN BY USING HIGH-VISIBILITY PPE OF THE RIGHT CATEGORY.

### EXCAVATIONS – PART ONE

WATCH OUT DURING EXCAVATION: THERE CAN BE MUCH MORE BELOW GROUND. PRESENCE OF UNDERGROUND SERVICES! BEFORE DIGGING, INFORM YOURSELF.

### EXCAVATIONS – PART TWO

THE EXCAVATION SITE MUST BE PROTECTED: DEFEND THE WALLS, DO NOT PUT LOADS ON THE EDGES AND SECURE THE DIFFERENCES IN HEIGHT CREATED.

### SPECIAL MACHINES

FOR A PERFECT ROAD, THE MACHINES MUST BE PUT TO SAFE USE. PREPARE AND POSITION THE MACHINES FOLLOWING THE USE AND MAINTENANCE BOOKLET AND USE THEM ACCORDING TO THE INSTRUCTIONS YOU ARE GIVEN.

### MOVING VEHICLES

PAY ATTENTION TO BLIND SPOTS, CHECK FOR THE PRESENCE OF THE BEACON AND THE ACOUSTIC BUZZER FOR REVERSING MANOEUVRES. IF NECESSARY, GET ASSISTANCE FROM A COLLEAGUE.

### SUSPENDED LOADS

LOADS MUST BE LIFTED USING THE RIGHT EQUIPMENT AND ACCESSORIES. REMEMBER THAT WHAT IS SUSPENDED CAN FALL. KEEP AT A SAFE DISTANCE FROM LOADS.

### CONFINED SPACES

THE SMALLER THE SPACE, THE GREATER THE CARE YOU SHOULD TAKE! GASES ARE NOT VISIBLE, BUT CAN BE DEADLY.

### PROMOTE SAFETY AND REPORT ANY HAZARDS

WHILE ON THE CONSTRUCTION SITE YOU ARE NOT ALONE: YOUR SAFETY DEPENDS ON OTHERS JUST AS THE SAFETY OF OTHERS DEPENDS ON YOURS. PREVENTION IS ABOUT WORKING AS PART OF A TEAM: ONE WORD CAN HELP TO AVERT AN INJURY.
